EDUCATION

Computer Science **December 2025**
Brigham Young University Provo, UT
Relevant Coursework: **Computer Networking** - CS 460 (OSPF, BGP, Switching Fabric), **Systems Programming** - CS 324 (Network Sockets, Blocking IO), **Database Modeling Concepts** – CS 452 (SQL Relational Database, Redis NSQL)

WORK EXPERIENCE

Software Engineer Intern **July 2025 – August 2025**
Hoth Technologies (Encrypted Messaging Platform) Provo Utah

- Accelerated backend video load speeds by 90% by collaborating with senior engineers to architect a high-performance thumbnail caching system
- Resolved edge cases in real-time group messaging system by debugging and optimizing asynchronous WebSocket and Redis Publisher/Subscriber data flows

Software Engineer Intern **May 2025 – July 2025**
Zendo Health (Health Services Administrator) Provo Utah

- Engineered an end-to-end automation system using C# and Selenium WebDriver to extract and process over 1000 client records from an electronic health record system
- Supported early project scoping and design through weekly meetings with senior leadership, actively communicating progress and roadblocks encountered to management

Web Developer **January 2024 – May 2025**
Learning Suite @ BYU (Learning Management System) Provo Utah

- Migrated a legacy PHP codebase to a modern Vue app, authored software design docs, wrote tests, and conducted peer reviews to maintain code quality
- Optimized database reliability by using MySQL Workbench to identify data storage inconsistencies and guarantee data integrity across the product suite
- Managed containerized deployments utilizing Docker Compose to self-host web applications

PROJECTS

Breadboard Robot | Embedded Programming, Serial Monitor **September 2025 – August 2025**

- Programmed embedded systems software in C++ on Arduino hardware, reading from multiple pin configurations and interfacing with the serial monitor to debug the current software state
- Learned about inductors and capacitors to effectively incorporate them into the breadboard design

Volunteer Experience

Youth Mentor and English Teacher **January 2026 – July 2026**
Peace Corps Thailand Trang, Thailand

- Become proficient in Thai in 6 months through coursework, self-study and interacting with Thai speakers
- Worked with local community leaders to organize events and outreach programs for the needy
- Created and taught English language courses to underprivileged students at four local elementary schools

TECHNICAL SKILLS

Languages | Python, JavaScript, C/C++, SQL, Git, C#
Developer Tools | GitLab, Docker, Redis, Jira, AWS (S3, DynamoDB)
